About Me

Software Engineer fluent in English, Chinese, and Malay, with proficient Japanese communication skills. After four years as a Network Engineer at Huawei Technologies, I transitioned into software development to pursue my passion for programming. I have since developed strong hands-on experience in C#, ASP.NET Core, and HR system development, contributing to the design and implementation of core modules, business logic, and approval workflows in a modern HR platform. Known for learning quickly, understanding systems deeply, and taking pride in writing efficient, maintainable code, I am seeking to continue growing as a software developer in challenging and collaborative environments.

Experience

Software Engineer

12/2024 – Present

PureHR | Kota Damansara, Selangor

Software Engineer at PureHR Sdn Bhd, responsible for developing a new HR system to replace the existing legacy platform used by clients primarily in Malaysia.

- Developed key Leave and Claims modules for a new HR system.
- Designed core data models and multi-level approval workflows for HR processes.
- Implemented backend features and business logic using C#, ASP.NET Core, EF Core, and SQL Server.
- Built and maintained user-facing features with Razor, JavaScript, jQuery, and DataTables.
- Troubleshoot and resolved technical issues across application logic, database queries, and system behavior.
- Technologies used: C#, ASP.NET Core MVC, ASP.NET Boilerplate (ABP), Entity Framework Core, SQL Server, JavaScript, jQuery, Razor Views, Bootstrap, DataTables, Mustache

Software Engineer

04/2024 – 09/2024

Footfallcam | Sungai Long, Selangor

Software Engineer at FootfallCam, a company specializing in people counting products and services. My primary responsibilities include server installation, maintenance, and providing technical support.

- Led and coordinated the installation of servers from scratch for three customers.
- Set up a staging server for internal company use.
- Conducted Server maintenance, monitoring and troubleshooting.
- Deployed the latest modules using Windows, Docker, and Kubernetes.
- Managed SSL certificate renewal and installation via IIS, HAProxy, and Cloudflare.
- Provided technical support and resolved tickets across the full solution architecture, including ASP.NET webpages, servers, and devices.
- Technologies used: MSSQL, MySQL, MariaDB, PostgreSQL, ASP.NET, Linux (Apache Kafka, Apache Doris, Apache Pulsar, Thingsboard, Keycloak, Haproxy, airflow), Docker, Kubernetes, Python, C#

Career Transition

07/2023 – 03/2024

To pursue my goal of becoming a software developer, I left my networking role and dedicated time to enhancing my programming skills through self-study and individual projects. During this career break, I also traveled and pursued personal interests.

- Created games using Unity Engine. ([Kitchen Chaos](#) , [Pixel Adventure Variation](#))
- Created a [Mental Arithmetic Android app](#) with Android Studio (Java).
- Technologies used: C#, Java, Unity

Network Engineer

06/2019 – 06/2023

Huawei Technologies | TRX, Kuala Lumpur

Served as a Network Engineer at Huawei Technologies, including six months in Nanjing, Jiangsu, China, as an RF Engineer, and three and a half years in Bangkok, Thailand, as a Datacom Engineer. Primarily responsible for delivering network solutions to telecommunications customers.

- Obtained Huawei Certified ICT Expert (Datacom-Carrier) Certificate.
- Awarded 2022 H2 TOP Excellent Operation Star for conducting one of the most network operations without network incident.
- Managed the 5G rollout for Jiangsu Province.
- Prepared and configured datacom configuration for routers in IPRAN network, leading and coordinating the router software upgrade project.
- Conducted Proof of Concept (POC) for routers and switches.
- Led and managed 5G2B projects.
- Installed the Network Cloud Engine (NCE) for clients.

Intern Java Application Engineer

09/2018 – 12/2018

Hitachi Ebworx | Petaling Jaya, Selangor

Gained valuable hands-on experience in server-side web application development, contributing to a project team focused on enhancing website functionality and performance.

Education, Certifications, and Skills

Universiti Tunku Abdul Rahman | Bachelor of Computer Science (CGPA:3.1541)

Graduated 08/2019

SMJK Jit Sin | Science Stream (SPM:6A+ 3A 1B+)

Graduated 11/2014

Exchange Student in Soka University, Tokyo (5 months)

Huawei Certified ICT Expert (Datacom-Carrier) (Certificate No: 010300102801808862331409)

Issued 12/2022

JLPT N3 Certification (Certification No: N3A534507A)

Issued 08/2025

ASP.NET Core | Linux | Datacom | Python | C# | C++ | Java | JavaScript | DevOps | SQL | MSSQL | MySQL | PostgreSQL | Network architecture | SSL | Agile methodologies | Virtualization | Microsoft Excel | Keycloak | Pulsar | Kafka | Doris | Cubejs | Haproxy | Regex | Unity | Grafana | Docker | JQuery | ABP | Razor | DataTable | Entity Framework Core

Multilingualism | Communication | Teamwork | Problem-solving | Adaptability | Leadership | Time Management

Awards

2022 H2 TOP Excellent Operation Star

Awarded H2/2022

- Awarded by the Thailand Carrier Network Business Group in recognition of exceptional contributions as a network professional, having performed one of the highest volumes of network operations without incident. At Huawei

Technologies, every network operation is handled with the utmost care and precision, as even a single incident can have significant consequences.
